Pre-Order your pasture raised chickens Now!

We are currently taking pre-orders for the 2019 season. All chickens are sold by pre-order only to ensure we order the correct number of chicks and provide the highest level of service possible for our customers.

About Our Chicken

We raise Cornish cross chickens that we buy from a local hatchery. At 3 weeks of age our chicks are moved from the brooder to moveable chicken tractors. These pens are designed to provide shade and protection from predators and poor weather while still allowing the chickens to spend their lives on pasture scratching and foraging. The pens are moved daily to a fresh section of pasture providing the chickens with plenty of forage and clean bedding. Thirty percent of the bird's diet can consist of grasses and foraged goodies with this method. The remainder of their diet consists of a custom ration designed to meet the dietary requirements of pasture raised chickens.

Why Pasture Raised Chicken?

Pasture Raised Chickens have two important distinctions from factory farm raised chickens. First is the health of the birds. Since our birds are not packed into crowded barns, we do not have to administer antibiotics or vaccines to keep the chickens healthy. And second, by providing our chickens access to well managed pasture we are able to produce a more nutrient dense chicken with higher levels of omega 3 fatty acids and vitamins, A and E. These differences allow us to produce a healthier bird and thereby healthier chicken for your family.

Organic & Non-GMO Feed

Although we do not claim to be Organic, we do raise our animals in alignment with the organic rules. We do not use herbicides or chemical fertilizers on our pastures and we source top quality local feed for our animal. Our chick feed is comprised of local organic or transitional organic, non-gmo feed to ensure we produce the healthiest and most nutritious chicken possible.

Processing Details

At 8-9 weeks of age the birds are full grown and ready for processing. We offer free on farm processing and the birds can be picked up fresh that day or frozen for pickup at a later time. Delivery is also available, but may require an additional charge.

For the 2019 Season we are offering our chickens for \$2.00/#. On average our chickens will weigh between 5 & 6 pounds after processing. We ask that everyone pay a deposit of \$5/bird.
